Parijat Rathore

Google | Flipkart | Rivigo | IITD
Bengaluru, Karnataka, India

Summary

Technologist, JAVA/J2EE Developer. Start ups suit me, new ideas energise me.

Experience

Google

Engineering Manager

August 2024 - Present (1 year 11 months)

Bengaluru, Karnataka, India

Leading the control plane and frontend (full stack) teams for Persistent Disk.

The BLR team owns the Back up and disaster recovery charter for PD.

Hiring senior engineers for backend and full stack.

LetsTransport

Chief Technology Officer

July 2021 - November 2023 (2 years 5 months)

Bangalore Urban, Karnataka, India

Letstransport envisions to solve the last mile logistics which is 18% of the \$240 billion logistics market in India. The company operates through two business models – local (<200 kms) and upcountry (>200 kms). It operates on a marketplace model with defining metrics as revenue, GM and DSO. My primary responsibilities are technology, people, strategy/vision, product, leadership and AOP. Demand side is enterprise/open market (SMB) and supply partners are from open market.

Business Problem

Help business grow from 300cr (July 21) to 3000cr (July 24) ARR, the current ARR is 800cr. Achieve GM of 12% and 8% from intra and inter respectively. Reduce the DSO to +5 working days of client payable date from current 45+ days.

Product

User facing: Partner and FO app.

Modules: Demand, Supply, BMS, TMS, Bidding, CMS, Trip book (partner & client), Invoice, Payments.

Engineering

Got funding for initiatives aligned to CI/CD (migration to K8, helm charts, centralized deployments), observability (tracing and centralized logging, monitoring/alerting), major tech debts around latency & resiliency.

Institutionalized on call process to reduce on call investment by 80% across the PODs. Bought developer productivity as a forefront metric by measuring investments across rework. Reduced rework by 50% & improve developer velocity by 2x.

Leadership

Efficient, consistent & self-sustaining interview process to reduce bias and filter top talent to hire 40+ engineers (80 offers).

Highly objective appraisal, promotion and succession planning by introducing engineering competency framework across all levels.

Engineering team is 50 folks across 5 PODs, 6 directs. Structure to OKR planning along with business & product by measuring available vs planned bandwidth and increasing the say/do across the org.

Conducted research across the org to identify challenges which prevent the pivot from an operational to a product problem-solving mindset.

Flipkart

Senior Engineering Manager

May 2019 - June 2021 (2 years 2 months)

Bengaluru Area, India

At Flipkart, I was part of the SSE and planning org, which enables every aspect of the marketplace and retail business from product and engineering perspective. The marketplace org in SSE is responsible for building and scaling the seller ecosystem from ground up, comprising functions of onboarding, listing, inventory and order management, settlements and support. The main metrics owned by Marketplace group is seller NPS, GMV and CM growth.

On the job my primary responsibilities here range from people, product, stakeholders, planning and technology.

Business Problem

Handle processing scale of 1.5 million orders per day and inventory management for 700+ million listings. Build products, which enabled FBF business to grow 7 to 15% for MP sellers. Enable smooth and timely seller payouts, commission management and visibility on seller dashboard.

Product

Seller fulfillment System (SFS), Seller Inventory Guarantee Service (SIGS), FBF Services, Seller Payouts & Settlements, Demand and Large Supply Planning

Engineering

Micro service based high scale distributed architecture with well-defined read and write paths, handles average transactional load of ~2k QPS. Workflow management patterns handling both sync and a-sync transactional tasks/calls. Read/write data handling in terabytes. Fixed systems for zero production outage and 2 zero issue BDD. Planning is a problem oriented around big data, DAG orchestration and machine learning (ab and delivery) platforms.

Leadership

Mentoring & growing a team of 27 in SSE and 15 in planning. Maintaining high engagement scores, right pyramid structure and strong succession plans. Have senior ICs and junior EMs reporting into to me. Creating self-sustaining structures and processes in the team for efficiency, quality and accountability. Open, inclusive/involved and transparent culture. Contribute to growth of org metrics by building products while being aware of end user and eco system capabilities.

RIVIGO

Director Of Engineering

September 2017 - May 2019 (1 year 9 months)

Gurgaon, India

Business Problem : Generate end-of-line metrics - trip (or CN) level profitability or truck's IRR and provide leverage to business for optimal asset utilization.

Engineering: Micro-service-based architecture in J2EE stack consumed by web client in Reactjs. Spring cloud being used for Feign Client, Circuit Breaker Pattern

EK based centralized logging with pipeline based on Filebeat and ingest node. Used Zipkin for distributed traceability and Actuator for VM metrics.

Monitoring platform by aggregation of data on APIs, DB and VMs. Using decay methodology to generate service and machine level alerts.

CD(I) pipeline using JIRA, Jenkins, Bitbucket, Docker and ECS. Manifest to 25-40% time saving for engineers and data capture for KPI/KRA.

Mature the stack to a self-healing service-based architecture

Leadership: Mentoring and growing a team of high performance individuals.

Responsible for growth path for each of them and develop them as future tech leaders. Hire, retain and develop team of 30-35 engineers.

Eicher Goodearth Private Limited (unit: Nicobar Design Studio)

CTO

July 2016 - September 2017 (1 year 3 months)

New Delhi Area, India

Combining design and technology Nicobar is here to create its niche space in the minds of the people. Using technology and design we aspire to create a unique omni channel experience for every customer.

Shopsity

CTO

September 2015 - May 2016 (9 months)

Noida Area, India

Shopsity fills the necessary gap in retail commerce and O2O, from both customer and seller perspective. Shopsity equips the customer with a discovery platform for the products selling in nearby markets through an android app and mobile site. Retailer/Sellers are provided with the tools for engagement, marketing, promotions and loyalty that help them retain and acquire customers. We have create a very seamless experience for the retailers for cataloging, order processing, campaign and offer management and engaging and transacting with the customer.

Shopsity has been acquired by Paytm - <https://m.yourstory.com/2016/11/paytm-acquires-shopsity/>

Unicommerce

Technical Architect

August 2013 - September 2015 (2 years 2 months)

New Delhi

As the eCommerce business is still evolving in India, the requirements and the workflows change as per demands of the business. In a marketplace scenario it is very important to understand the requirement of the sellers based on the

use cases that they present. Uniware as a product aims at merging all those use cases efficiently and present them with useful features of OMS, IMS, Procurement and Reconciliation. My role involves:

- Developing new features as per optimisations in business workflows and requirements from customers
- Discussions with customers while charting the work flows of new features
- Technical implementation of those requirements and taking them into production environment.
- Evolve and improve the feature as per feedback from the customer.

Exponential

5 years 11 months

Team Lead

July 2011 - May 2013 (1 year 11 months)

Noida Area, India

- Managing the engineer team
- Providing POC and implementation designs
- Managing releases

Senior Software Engineer

July 2009 - June 2011 (2 years)

- Individual technical Contributor
- Implementation designs

Software Engineer

July 2007 - July 2009 (2 years 1 month)

Worked on development of a lead generation platform. The platform had data filtering algorithms which based on data submitted by user filtered relevant results for the user. A reporting and administration platform too was developed for generating relevant reports and managing data to be shown in the lead generation portal by the business team.

Qwest Software Services

Software Engineer

March 2006 - July 2007 (1 year 5 months)

Networx Project: Software development for provisioning work flow.
