The Joy of Computing Using Python

Rakesh Kumar.V

Software Engineer 2 @ PayPal | Ex-Zoho | Software Development |
JAVA | Spring Boot | SQL | Kafka | Microservice
Tamil Nadu, India

Summary

As a Member Of Technical Staff at Zoho, I apply my skills in Back-end Development, Java Programming, and Design Pattern to create innovative and user-friendly software solutions. I have been working at Zoho since September 2021, after completing a three-month traineeship at the same company. Prior to that, I was a Programming Analyst at Cognizant for four months, where I gained valuable experience in software development and testing. I graduated from Kongu Engineering College in 2021 with a Bachelor of Engineering in Electronics and Instrumentation Engineering, where I learned the fundamentals of electronics, instrumentation, and programming. I also hold two certifications from Udemy and NPTEL in Android Development and Python, respectively, and a badge from HackerRank in Java. I am passionate about learning new technologies and solving real-world problems with software. I am a team player, a quick learner, and a creative thinker who strives to deliver quality work and satisfy customer needs.
