Anomaly Detection in Time Series Data with Keras
Convolutional Neural Networks in TensorFlow
Sequences, Time Series and Prediction
Introduction to TensorFlow for Artificial Intelligence, Machine Learning, and Deep Learning

Publications

Applicability of AutoML to modelling of time series data

Ajanta Kancharla

Senior Software Engineer | Ex PayPal
Bengaluru, Karnataka, India

Summary

I'm a Senior Software Engineer with 5 years of experience building scalable web apps and microservices using Java, Spring Boot, and React. I specialize in backend systems, API design, and event-driven workflows, with strong skills in database optimization and CI/CD pipelines. Passionate about designing reliable, high-performance systems that align closely with business goals.

Experience

MakeMyTrip

Senior Software Engineer 2
April 2025 - November 2025 (8 months)
Bengaluru

- Rolled out Personal Bag Allowance across APIs, improving fare clarity for 20M+ monthly searches and boosting conversions.
- Architected a modular communication engine to deliver multi-channel notifications (email, WhatsApp, in-app), eliminating manual workflows and reducing operations effort.

PayPal

Software Development Engineer 2
January 2023 - April 2025 (2 years 4 months)
Bengaluru, Karnataka, India

- Implemented an AMQ-based async workflow to replace manual escalations, streamlining 8.5% of daily case volume (~4.5K/day) and reducing case creation latency.
- Delivered maker-checker APIs + UI in SCMS with automated email triggers, slashing approval turnaround by 70%, achieving 100% VP adoption, and eliminating 40+ manual emails/week.
- Built an event-driven workflow in SCM to process 600K+ PEP cases, routing Lookback cases to models without overloading L2 queues.
- Integrated model-driven dismissals and stored outcomes with pub-sub infra, reducing manual review workload.

- Directed Phase 2 of the EBR initiative: designed APIs to fetch transaction details via IBAN/transaction numbers, architected backend schemas for compliance, and built ReactJS UI to automate email communication with external banks.

Telstra

2 years 6 months

Senior Associate Software Engineer

November 2021 - January 2023 (1 year 3 months)

Hyderabad, Telangana, India

Associate Software Engineer

August 2020 - November 2021 (1 year 4 months)

Hyderabad, Telangana, India

ADP

Software Engineering Intern

June 2019 - August 2019 (3 months)

Hyderabad Area, India

Interned as a Python developer at ADP. Worked with Ansible Notebook, Splunk, Redis, Celery, MongoDB, Angular, etc to achieve event-driven automation of morning routine at ADP, effectively saving 15 minutes of manual work.

IIIT Hyderabad

Summer Research Intern

May 2018 - July 2018 (3 months)

Hyderabad

Detection of Bias in English Sports Newspapers

Mentor: Dr. Radhika Mamidi, Associate Professor, IIITH

This research project aimed at identifying bias or favoritism in the reporting of the outcome of IPL matches in news sources. We collected 10,000 headlines and first paragraphs from the sports section of over 10 Indian local English newspapers. Using CoreNLPStanford parser we identified the subject, object, and root of sentences and trained different statistical and deep learning models to identify their relationship. Word embedding of the data was made using Glove.

Education

Mahindra École Centrale

Bachelor of Technology, Computer Science · (2016 - 2020)

Urbane Junior College

Senior Secondary Education, Engineering Science · (2014 - 2016)

Delhi Public School Bhilai

High School Diploma, CBSE · (2013 - 2014)
