Kavya Arora

Software Engineer at PayPal
Bengaluru, Karnataka, India

Summary

Curious, driven, and always up for a challenge — I'm a Software Engineer with hands-on experience in building reliable cloud-based applications. I've worked across the stack from crafting APIs to streamlining deployments.

Programming Languages: Java, C, C++, Python, Go

Scripting & Web Languages: JavaScript, PHP, HTML

Frameworks & Technologies: .NET Core, Angular, Bootstrap, Node.js, Pytest

Cloud Platforms: Azure Cloud, OpenShift, Pivotal Cloud Foundry, AWS, GCP

DevOps & CI/CD: Jenkins, Git, GitHub, uDeploy, Harness

Databases: Microsoft SQL Server, Oracle

IDE/Tools : PyCharm, VSCode

Container Platforms : Docker/Kubernetes

Operating Systems: Windows, Linux, Mac

Experience

PayPal

Software Engineer

November 2025 - Present (8 months)

Wells Fargo

4 years 3 months

Software Engineer

August 2022 - October 2025 (3 years 3 months)

Bengaluru, Karnataka, India

Working as part of the Wealth & Investment Management team, contributing to modernization of large-scale financial applications with a focus on performance, security, and scalability.

Designing and implementing backend services in .NET Core and building responsive UI components using Angular for enterprise-grade platforms.

- # Developing secure, RESTful APIs that power critical wealth management tools and client-facing functionalities.
- # Led CI/CD workflow migration, achieving a 30% reduction in deployment-related costs, enabling zero-downtime deployments, and improving release stability and delivery frequency.
- # Collaborating with cross-functional teams to translate complex business requirements into scalable technical solutions.
- # Contributing to code reviews, mentoring team members, and driving continuous performance and quality improvements.

Program Associate

August 2021 - July 2022 (1 year)

Bengaluru, Karnataka, India

- # Modernized legacy systems by leading their transformation to cloud-native architectures, significantly improving scalability and reducing maintenance overhead.
- # Implemented automated test coverage strategies and enhanced code quality, resulting in a noticeable reduction in post-production issues.
- # Contributed to performance optimization, actively participated in peer code reviews, and resolved critical incidents to maintain high system availability.
- # Developed and deployed applications across Azure, Pivotal Cloud Foundry (PCF), and OpenShift, ensuring alignment with cloud and DevOps best practices.
- # Collaborated within Agile Scrum teams using JIRA, contributing to sprint planning, daily stand-ups, and retrospectives for timely and efficient feature delivery.

ACM, Association for Computing Machinery

Summer Research Intern

June 2020 - July 2020 (2 months)

MyGov India

Summer Intern

June 2019 - July 2019 (2 months)

- Researched and developed a deep convolutional neural network model for text detection and classification using a data synthesis algorithm. It improved the classification efficiency to 95%.
- Worked closely with development teams to ensure accurate integration of models into firm platforms.

Education

INDIRA GANDHI DELHI TECHNICAL UNIVERSITY FOR WOMEN

Bachelor of Technology, Information Technology · (2017 - 2021)
