Satyam Verma

Senior Software Engineer at Amazon | Ex-Swiggy
Bengaluru, Karnataka, India

Summary

I am a software developer with 8+ years of experience in Software Product development, Architecture design, Team Leadership, and Coding. I have worked on various Software Product in different domains which includes Ecommerce, Alexa, Food Tech, Finance, Banking, Automotive and ERP. Some of these products are already launched and various companies in India and abroad are using them. I am currently working in amazon. I have designed and built highly scalable systems with complex inter-dependencies involving multiple teams and micro-services for the systems that are being used by millions of the customers worldwide. Previously, I have worked in the finance product development team in Swiggy, a food tech company in India. Amazon: Huge number of orders comes to the platform daily. I have worked on various services that serve the daily traffic on amazon, and hosted alexa devices related features and pages on amazon. Swiggy: Huge number of orders comes to the platform daily. Our team takes care of all the payment and its communication related services across Swiggy. This includes payout calculations, invoicing, various payments, bank integrations and cash handling of all restaurants and delivery executives. I am a creative developer who can always be trusted to come up with a new approach. I spend a lot of time understanding the business and the end user before starting my work on the product or a new feature. I have worked on multiple technology stack and frameworks, and I am always open to learning a new one. I have pursued a BE in computer science from PESIT South Campus in Bangalore (2012-2016). You can reach me either through this profile or by phone/ whatsapp at +91 7829762226.
