Ritika Singh

Software Engineer 2 @ Blinkit | Web Development | JavaScript |
React JS | Next JS | TypeScript
India

Summary

I am a software engineer with around 3.5 years of experience, and I enjoy building products that make people's work easier and more efficient. Most of my experience has been in building web applications, especially the parts that users interact with every day. I like working on problems where clarity, reliability, and ease of use matter more than complexity.

I currently work as a Software Engineer II at Blinkit. My work includes building both internal and external tools that support finance, operations, supply chain, and vendor-facing teams. These tools are used at scale, often under time pressure, so my goal is always to build systems that are simple to use, stable, and easy to trust.

Before Blinkit, I worked on Namma Yatri, an open mobility platform built to directly connect commuters and auto drivers without middlemen. I was an early contributor and worked on core modules related to driver and ride management. The product served a large number of drivers every day, and it felt meaningful to work on something that had a direct impact on people's income and daily lives. I also helped mentor junior developers and interns, which taught me the importance of patience, clear communication, and good code practices.

Experience

Blinkit

Software Engineer 2
July 2024 - Present (1 year 11 months)
Inventory - supply chain management

Accolite

2 years

Software Engineer

October 2022 - March 2024 (1 year 6 months)

Bengaluru, Karnataka, India

Client : Juspay Technologies

NAMMA YATRI :

1. Spearheaded the development of the user-centric Admin Driver Management module, orchestrating the optimization of onboarding processes for Auto Drivers. Leveraging ReactJs, ReScript, HTML, Tailwind CSS, and RESTful APIs.
2. Worked on the "Open Data NAMMA YATRI" website. Utilized ReactJs and ReScript to implement versatile component architecture, consolidate tabular data, and integrate collaborative High-Charts for making complex information easily comprehensible to the general public.
3. Innovatively addressed driver issue management, empowering auto drivers to articulate their concerns, ensuring swift and precise resolutions for auto drivers.

DASHBOARD :

1. Led the critical AB Dashboard project, ensuring the successful deployment of new software releases. Optimized deployment and quality assurance protocols to enhance operational efficiency.
2. Engineered dynamic and reusable components, tailoring them seamlessly to meet diverse dashboard requirements. Leveraged RESTful APIs extensively to ensure consistent data integration and continually enhanced functionality.
3. Implemented rigorous front-end security measures. Established a robust tracker pipeline for backend changes. Developed the project using ReactJs and ReScript.

Software Engineer

April 2022 - October 2022 (7 months)

Bengaluru, Karnataka, India

Education

BMS Institute of Technology and Management

Bachelor of Engineering, Computer Science · (2018 - 2022)

Sri Chaitanya College of Education

Senior secondary education · (2016 - 2018)

Sophia High School

Secondary Education · (2016)
