Abhishek Gautam

Software Development Engineer II at Blinkit
West Delhi, Delhi, India

Summary

I am a passionate and driven Senior Software Engineer with a strong foundation in computer science, demonstrated through my B. Tech. in Computer Science and Engineering from IIT Delhi. Over the years, I have honed my skills in Java, React.js, Spring Boot, and Oracle SQL, among other technologies, making me a versatile and adaptable professional in the tech industry.

Currently, I am contributing to Reliance Jio, where I co-developed a centralized data system, streamlining master data management for subsidiaries like Retail and JIO using Spring Boot and Kafka. I have a knack for implementing robust CRUD operations, managing real-time data streaming integrations, and enhancing process automation with Camunda workflows. My efforts have significantly improved data management and operational efficiency across multiple projects.

In my role, I thrive on creating user-centric solutions, evidenced by my work on dynamic forms and reusable components for partner onboarding, which improved application modularity and accelerated development speed. Additionally, my experience with performance analytics dashboards has driven a 15% increase in JioMart B2B sales.

My journey is marked by continuous learning and achievements, including a 4-star rating on CodeChef, an Expert rating on Codeforces, and commendable ranks in Google KickStart and CodeJam competitions. These accolades reflect my problem-solving abilities and my commitment to staying at the forefront of technological advancements.

Beyond my technical expertise, I am dedicated to mentoring junior developers, fostering a collaborative and high-performance work environment. I am always eager to tackle new challenges and contribute to innovative projects that make a tangible impact.

Let's connect if you're interested in a dynamic software engineer who brings a blend of technical acumen, project management skills, and a proven track record of driving impactful solutions.

Experience

Blinkit

Software Development Engineer II

August 2025 - Present (10 months)

Gurugram, Haryana, India

Jio Platforms Limited (JPL)

4 years 1 month

Software Development Engineer II

December 2023 - July 2025 (1 year 8 months)

Navi Mumbai, Maharashtra, India

Software Development Engineer I

July 2021 - November 2023 (2 years 5 months)

Mumbai, Maharashtra, India

- Spearheaded nationwide engagement tracking for merchants, expanding into Kirana, HoReCa, and Institution verticals.
- Curated 16+ performance analytic dashboards, ensuing 15% increase in JioMart B2B sales.
- Optimized bulk data transactions by 90% through spring batch to upload data in Oracle SQL.
- Elevated the level of visibility for decision-makers by scaling up multiple dashboards to aggregated view.
- Streamlined merchant transformation to Jio Smart Kirana, integrating CSO & D365.
- Engineered Java, JavaScript, JSPs, and Spring framework integration, facilitating onboarding of 3.5mn+ kirana merchants through the Web App.
- Conducted code reviews and provided mentorship to junior team members, fostering a collaborative and high-performance work environment.

Education

Indraprastha Institute of Information Technology, Delhi
Bachelor of Technology, Computer Science · (2017 - 2021)

Kendriya vidyalaya

High School Diploma · (April 2005 - April 2017)
