Ekansh Jain

Software Developer | Blinkit | IIT Kgp' 23
Jaipur, Rajasthan, India

Summary

I am a final year undergraduate at IIT Kharagpur. I have worked on enterprise-level projects involving frontend web and app development using ReactJS and React Native and backend development in NodeJs and Flask.

In addition to my development work, I am skilled in troubleshooting problems and resolving bugs within an existing system.

I have developed a strong technical base and am searching for opportunities to further develop my skill set.

Experience

Blinkit

3 years

Software Development Engineer 2

January 2025 - Present (1 year 5 months)

Software Development Engineer 1

June 2023 - December 2024 (1 year 7 months)

Gurugram, Haryana, India

Working on the Inventory and locations module of Blinkit and designing a scalable system for Inventory and Locations Management.

Blinkit
