Best Project
Best Paper
Pat on the Back Award

Publications

IoT based Home Automation System
Generic, Stand-Alone IoT Solution for Cloud Connectivity in Electric Vehicles

Aditya Deshmukh

Software Engineer at Blinkit
Bengaluru, Karnataka, India

Summary

Software engineer having experience in full-stack development with expertise in backend development and cloud.

Experience

Blinkit
Software Development Engineer 2
November 2025 - Present (7 months)
Bengaluru, Karnataka, India

NEWME
Software Engineer
December 2024 - November 2025 (1 year)
Bengaluru, Karnataka, India

HELLA
3 years 2 months

Software Engineer
August 2022 - December 2024 (2 years 5 months)
Pune

- Extensively contributed to 2 projects throughout the software development life cycle ultimately taking them from development to production.
- Independently developed the entire backend using Django, MSSQL and web frontend of a cloud connected electric 2-wheeler ecosystem with a forecasted 1L+ user-base.
- Closely collaborated with the AI team for developing 7+ microservices in Python.
- Played a key role in implementing their intercommunication using RabbitMQ and their deployment within Docker images, via Azure DevOps.
- Contributed significantly to the architecture and development of a Flask and React based 'autonomy service' for enabling end-users to dynamically train ML models or fine-tune pre-deployed models using Azure ML Studio.

Project Intern

November 2021 - August 2022 (10 months)

Pune, Maharashtra, India

- Architected an end-to-end cloud connectivity system for electric 2-wheelers.
- Developed 3 microservices in Flask containing REST APIs for 3+ ML and data-oriented features.
- Deployed microservices as Docker images to Azure App Service and VMs.
- Reduced capital cost by 60% by developing a customizable, GUI controlled, embedded IoT edge device.
- Implemented real-time data monitoring and instant fault notification features (via Firebase) with <100ms avg. latency to reach a React Native app.

Markytics

Python Developer

October 2020 - January 2021 (4 months)

- Developed REST APIs to store, analyse and present graphical representations of various categories of data of 5000+ users at a time in a Postgres database, using libraries like Pandas, NumPy.
- Performed task scheduling in Python to automate email generation, used AWS Lambda.
- Significantly contributed to backend development of 2 projects using Django, hosted on AWS EC2.

Siemens Technology India

Summer Intern

June 2017 - June 2017 (1 month)

Airoli, Maharashtra, India

Education

College of Engineering Pune

Master of Technology - MTech · (2020 - 2022)

SRM University

Bachelor of Technology - BTech · (2015 - 2019)

DAV Public School, Airoli

Higher Secondary, CBSE · (2013 - 2015)
