Catalogue Management System (CMS)

- Worked on a comprehensive overhaul of the product onboarding process, resulting in streamlined operations and enhanced efficiency.
- Revamped Product page to BFF architecture. Implemented new features and resolved bugs on the Product Description page.
- Rectified various issues across dashboards and backend systems.
- Developed and deployed a high-performance query service utilizing Golang and Protocol Buffers. This service powers the Blinkit product description page, delivering product information in less than 1ms.

- Significantly optimized a critical daily nightly cron, reducing its execution time by 96% from 7 hours to just 13 minutes.

Team Syndicate

Founder, Project Head

January 2020 - May 2025 (5 years 5 months)

AfterNow

Mixed Reality Developer

January 2021 - January 2023 (2 years 1 month)

AnPrez: A mixed reality multi user application which enables immersive 3D presentation experience for the user, combined with voice chat feature for participants to interact with each other in the session.

- Worked on, brought support and managed app code for various platforms like Hololens, Quest, Mac, Windows, iOS, Android and Linux.
- Individually built an end to end low level inhouse advanced VOIP solution compatible with VR, desktop and mobile backed by Azure vps.
- Implemented and architected various aspects of app such as Inputs, Networking, Caching, Memory Management, etc.
- Re architected slide loading logic which increased the slide limit of a presentation from 16 to ~1000.
- Integrated Azure speech to text with voice chat for live transcription.

Hewlett Packard Enterprise

Android Developer

June 2019 - July 2019 (2 months)

Education
