Summary

Hello, I'm Aryan Jain, a Bachelor of Engineering student specializing in Computer Science at SNJB's College of Engineering, Chandwad. I am passionate about using technology to solve complex problems and make a positive impact on the world. I have developed a strong foundation in programming languages such as C++, Data Structures, and Algorithms, along with expertise in web technologies like HTML, CSS, and JavaScript. As a creative problem solver and team player, I am committed to delivering high-quality work and exceeding expectations. I am eager to connect with other technology professionals and explore new opportunities for growth and development. Let's connect!

Experience

Medimaze Solutions Pvt Ltd

Software Developer Intern

March 2026 - Present (4 months)

Pune/Pimpri-Chinchwad Area

Developing and integrating Ayushman Bharat Digital Mission (ABDM) compliant healthcare modules into Health Management Information System to enable secure digital health record exchange and interoperability.

Implemented backend services using Java, Spring Boot, REST APIs, RabbitMQ and MySQL for patient registration, appointment management, and health data workflows.

Integrated ABHA, Health Records, and Consent Management APIs for secure patient data exchange.

Elevizo

Web Development Intern

November 2025 - Present (8 months)

Pune, Maharashtra, India

Designed and developed the resume builder interface, simplifying the end-to-end resume creation flow and improving overall usability and visual consistency.

Implemented a secure online payment system using Razorpay, enabling subscription-based access and smooth transaction handling.

Built and enhanced multiple frontend pages with a strong focus on performance, responsiveness, and clean UI/UX.

Collaborated on feature improvements to streamline user interactions and reduce friction in critical user journeys.

Ensured cross-device compatibility and maintained scalable, maintainable frontend code.

Labmentix

Web Development Intern

June 2025 - Present (1 year 1 month)

Pune, Maharashtra, India

Created and launched Labmentix.in, resulting in a 80% increase in online traffic and engagement.

Engineered a responsive UI/UX with React.js and Next.js that improved user satisfaction scores by 70% through enhanced interactivity.

Optimized website performance and implemented SEO strategies, leading to a 60% decrease in load time and improved search rankings.

Advanced technical skills through mentorship, leading to the adoption of industry best practices in web development.

Developed a full-stack examination platform that securely supports over 50,000 users with 99.9% uptime, ensuring reliability.

Celebal Technologies

Web Development Intern

June 2025 - August 2025 (3 months)

Jaipur, Rajasthan, India

Bosch

Project Trainee (Software Development)

January 2025 - March 2025 (3 months)

Nashik, Maharashtra, India

Developed a Complaint Management System (CMS) improving issue resolution efficiency.

Optimized data retrieval and processing using MS SQL, Django, JavaScript, and jQuery, ensuring efficient

performance.

Improved user experience and workflow automation, reducing manual effort in report management.

Collaborated with cross-functional teams to ensure system reliability and usability.

Google Developer Groups On Campus SNJB

GDG Web Developer Lead

October 2024 - December 2024 (3 months)

Chandvad, Maharashtra, India

Developed and maintained the official GDG OnCampus SNJB website with modern web technologies.

Led a team of developers, fostering collaboration and delivering scalable solutions.

Enhanced user engagement through interactive features and responsive design.

Mentored team members and contributed to GDG events to grow the campus developer community.
