Abhishek Damarasing

SDE 2 at Microsoft | MS Security Org | Ex-Software Engineer at Amazon, Epam Systems
Hyderabad, Telangana, India

Summary

I'm a Software Engineer (3+ years) passionate about designing and coding applications that solve real-world problems and create measurable impact. Currently, I work as an SDE 2 at Microsoft security wing, where our team owns global-scale operations—serving 200M+ customers and 100K+ associates across 20+ languages. My journey spans backend engineering, cloud-native development (AWS, Azure, GCP), and Generative AI integration. From optimizing APIs that cut latency by 30% and boosted throughput by 20%, to deploying AI-driven decision support systems that reduced manual interventions by 25%, I thrive on creating scalable, reliable, and intelligent solutions. I'm especially drawn to building products that matter—applications that not only perform at scale but also make everyday experiences more seamless for people. I believe engineering is most powerful when it bridges innovation with usability. What drives me: Turning complex business needs into elegant technical solutions. Building highly available distributed systems that people rely on every day. Exploring AI and emerging technologies to improve workflows and decision-making. Collaborating across product, design, and engineering to bring ideas to life. Always eager to learn, share, and contribute, I'm looking for opportunities to push boundaries and build the next generation of useful, reliable, and impactful products.

Experience

Microsoft
SDE II
January 2026 - Present (6 months)
Hyderabad, Telangana, India

Software Engineer II at Microsoft, working within the Microsoft Security organization. Part of the Microsoft Purview team, contributing to the development of a new security service focused on strengthening data security and compliance solutions at scale.

Amazon

SE III

July 2024 - January 2026 (1 year 7 months)

Hyderabad, Telangana, India

EPAM Systems

Software Engineer

September 2022 - June 2024 (1 year 10 months)

Hyderabad, Telangana, India

Education

Anil Neerukonda Institute Of Technology & Sciences

Bachelor of Technology - BTech, Information Technology · (June 2018 - May 2022)

Andhra University

Master of Arts - MA, Political Science and Government · (January 2024)
