Lavanya Ravinutala

SDE at Microsoft
Hyderabad, Telangana, India

Summary

As an accomplished Full Stack Developer, I specialize in creating dynamic and intuitive user interfaces with a strong focus on Module Federation, Webcomponents, and Microfrontends. Proficient in both frontend and backend technologies, I excel at designing seamless user experiences and robust server-side logic. Adept at integrating cutting-edge tools and frameworks. My expertise spans developing innovative solutions, leading successful application conversions, and enhancing user experiences. With a proven track record in resolving complex integration and deployment challenges, I consistently deliver high-quality, reliable software. Passionate about continuous learning and innovation, I thrive in fast-paced environments, driving projects that advance technology and improve functionality.

Experience

Microsoft
Software Development Engineer 1
October 2024 - Present (1 year 9 months)
Hyderabad, Telangana, India

Phenom
2 years 9 months
Product Development Engineer 1
July 2022 - October 2024 (2 years 4 months)
Hyderabad, Telangana, India

Led the conversion of applications, beginning with Certificate Manager and HRIT, into a Module Federation architecture using React JS and Webpack. Pioneered the team's efforts by conducting POCs and driving the adoption of this innovative approach.

Managed end-to-end project planning, coding, and unit testing ensuring reliable and secure operations of HRIT and others.

Developed reusable Storybook UI components using React JS, significantly enhancing development efficiency and ensuring scalable performance across projects.

Developed Tekton Pipelines to attach certificates to load balancers and automate certificate publishing operations.

Contributed to the development in frontend and APIs for the Certificate Manager Tool using Java, Spring Boot, and PostgreSQL and React JS ensuring robust and efficient certificate management.

Enhanced various microfrontends, adding features and fixing critical bugs to improve functionality and performance.

App Studio (Frontend): Played a pivotal role in the development of App Studio, a revolutionary platform enabling the creation of UI applications without the need for traditional coding. Leveraged frontend expertise to contribute to the development of an intuitive interface, empowering users to design and automate UI applications effortlessly.

Certificate Manager (APIs, Frontend, Tekton Pipelines): Played a key role in the development of Certificate Manager, enabling seamless management of certificate signing, publishing, and renewal processes. Implemented APIs, frontend functionalities, and Tekton Pipelines to automate certificate-related tasks.

HRIT (Frontend Development): Contributed to the frontend development of HRIT, a comprehensive application serving as a central hub for hosting various micro applications and plugins within our company's ecosystem.

Collaborated with cross-functional teams to ensure seamless user experience and integration of diverse functionalities.

Product Development Engineer Intern

February 2022 - June 2022 (5 months)

Hyderabad, Telangana, India

Education

Gayatri Vidya Parishad College of Engineering for Women,
Madhurawada

Bachelor of Technology - BTech, Computer Science · (June 2018 - June 2022)
