Anmol Nagvanshi

SDE at Oracle (OCI) | Backend | Frontend
Varanasi, Uttar Pradesh, India

Summary

A Software Engineer with experience in backend and frontend web development, and skilled in data structures & algorithms. An avid problem-solver with a good learning attitude.

Technical Skills:

Programming Languages: Java, Python, JavaScript, TypeScript, Scala, C++

Backend Frameworks: Spring Boot, Flask, FastAPI

Frontend Frameworks: ReactJs, HTML5, CSS3, Tailwind, Jest

Databases: PostgreSQL, MongoDB, DynamoDB, NoSQL, SQL

Cloud: AWS, Heroku

Mobile Platforms: Android

Version Control: Git

Core: Data Structures & Algorithms, Object Oriented Design, Databases

Experience

Oracle

Software Development Engineer

June 2023 - Present (3 years 1 month)

Bengaluru, Karnataka, India

1. Working under OCI in Oracle's Threat Intelligence Team.
2. Worked on Identity Henosis Integration project for scaling the service.
3. Migrated cache curator and threat processing security services from JDK 8 to JDK 17.
3. Optimized API requests in our main UI tool by 25 % and improved user experience by increasing accessibility.
4. Increased unit test coverage of our plugin by 30 %, using Jest framework.

Amazon

Software Development Engineer

December 2021 - March 2023 (1 year 4 months)

Bengaluru, Karnataka, India

Worked under Distribution Centre Tech which builds software for warehouse management including storage, distribution, and logistics. Part of the Labor Performance and Management team, which develops software for managing the workforce in Distribution Centres and complex process path workflows that associates daily go through.

Contributions:

1. Implemented glue jobs for the calculation of productivity rates of associates for direct process paths in a DC.
2. Improved execution time of glue jobs by 50 - 70 % using data partitioning.
3. Developed indirect process path tracking feature, using Java and React, which minimizes error in productivity calculation.
4. Reduced time for data backfilling by 90 % through automation, which helps in data loss and quality issues.
5. Owned and delivered feature for supporting multiple temperature zone sites to our productivity tool across 10 direct and 46 indirect process paths.
6. Integrated sonar code analysis tool in our packages, removed several code smells, and increased our test coverage by 30 %.
7. Contribution to on-call cycle and resolved multiple high-severity tickets and increased operational excellence.

Zemoso Technologies

Software Engineer Intern

October 2021 - December 2021 (3 months)

Hyderabad, Telangana, India

1. Worked on building frontend and backend of an e-commerce platform for selling banners and boards.
2. Developed features including product orders, coupon codes, and Payments.

Education

Laxmi Devi Institue of Engineering and Technology

Bachelor of Technology, Computer Science and Engineering · (2017 - 2021)

Raj English School, Varanasi

Class XII (CBSE) · (2015 - 2016)

St. Joesph's Convent School, Varanasi

Class X (ICSE) · (2013 - 2014)
