Navya Madhuri

Software Engineer @BBI || Java || Spring Boot || Microservices ||
Rest API
Bengaluru, Karnataka, India

Summary

Dedicated Software Engineer with over 4+ years of experience at Blackbuck Insights. Started as an Intern in December 2021 and transitioned into a permanent role upon graduation in August 2022. Experience in developing, testing and deployment applications in Java and Android. Hands on experience in developing applications using Java SpringBoot & Maven, Graddle, Swagger UI, GRPC, Rest API. Used GitHub & Bitbucket as version control. Experienced in developing native android applications using java, integrating Firebase features such as Cloud Fire Store (DB), Cloud Messaging (FCM Notifications), Test Lab, Authentication (Google Sign In, and OTP authentication) and App Distribution (for testing with limited group). Experienced in giving KT sessions to the new team members.

Skills:

- * Programming Languages: Java
- * Frameworks: SpringBoot, gRPC, Swagger UI.
- * Build Tools: Graddle, Maven.
- * Software Packages: MS-Office, Excel, Power point.
- * Web Technologies: HTML, CSS, JS.
- * Cloud Technologies: Firebase for Android/Java.
- * Orchestration tools: Jenkins
- * Agile Project Management Tools: Rally, Jira

Not only working on the project works. Keeps working on the value adds to the organization which helps me in growing new knowledge and useful to the project.
