Joel Jacob John

Associate Developer @SAP | Ex-Software Engg. Intern @Emirates | Finalist, Build For Bharat 2024 | Ex-Computer Vision Intern @Curvelogics | Ex-Data Scientist Intern @Scifor | CSE '25, NIT Rourkela

Tiruvalla, Kerala, India

Summary

I'm Joel Jacob John, a final-year Computer Science & Engineering student at NIT Rourkela and currently an Associate Developer Intern at SAP Labs. I'm passionate about creating meaningful, scalable tech solutions—whether it's through software engineering, artificial intelligence, or enterprise technologies.

Over the past few years, I've built a strong foundation in both development and data science through diverse internships, hackathons, and academic work. My experience ranges from working with enterprise platforms and modern frameworks to developing intelligent applications that blend performance with purpose.

I'm proficient in languages like Python, C++, and JavaScript, and have hands-on experience with frameworks and tools including Flask, TensorFlow, PyTorch, Firebase, Power BI, PowerApps, and SAP ABAP & Fiori. I'm equally comfortable working on backend logic, frontend interfaces, and data-driven systems.

Beyond technical skills, I value collaboration, adaptability, and a mindset of continuous learning. I enjoy taking on challenges that require analytical thinking, creativity, and a product-oriented approach.

I've also been fortunate to receive recognition at national-level hackathons and programming competitions, which have helped me grow as a team player and problem solver.

What I bring to the table:

A strong understanding of system design, data structures, and algorithms

Cross-functional experience across software development, data analytics, and AI

A growth mindset with a passion for learning, building, and improving

The ability to deliver clean, maintainable code and meaningful user experiences

Experience

SAP

1 year 6 months

Associate Developer

July 2025 - Present (1 year)

Bengaluru, Karnataka, India

Associate Developer Intern

January 2025 - July 2025 (7 months)

Bengaluru, Karnataka, India

Emirates

Software Engineer

June 2024 - July 2024 (2 months)

Dubai, United Arab Emirates

Opencode NIT Rourkela

Member Technical

December 2022 - June 2024 (1 year 7 months)

Raurkela, Odisha, India

I am a technical member at the technical club of NIT Rourkela.

Scifor Technologies

Data Scientist

October 2023 - May 2024 (8 months)

Bengaluru, Karnataka, India

- Developed a web application that's dedicated to visualizing data from the IMDb Top 250 rated movies. This application empowers users to explore and

gain insights from a rich dataset, including IMDb ratings, certificates, IMDb votes, and release years. It features a diverse range of data visualization tools, from histograms to bar charts, scatter plots, box plots, pie charts, line charts, and heatmaps. To enhance user accessibility, the project employs Streamlit, a user-friendly framework, to transform these insights into an interactive web app. Within the app, a dashboard offers users the freedom to select and view the specific data visualizations of their choice. This project not only serves as a valuable data exploration tool but also contributes to data-driven decision-making and acts as an educational resource for data analysis.

- Showcased expertise in deep learning and computer vision by developing a CNN-based image classification project using Python and Keras. Achieved high accuracy with the CIFAR-10 dataset, demonstrating proficiency in model development and implementation.

- Worked on the development of a comprehensive dashboard for a laundry service application, enabling efficient tracking of expenses, sales, and service prices. Leveraging Power BI, I integrated diverse functionalities, including Power BI Automate, to automate data processes seamlessly. Prior to this, I employed Python to extract data from Firebase, ensuring a streamlined data pipeline. Additionally, I utilized Power BI's array of visualization tools and charting capabilities to generate insightful reports on income and sales trends, empowering stakeholders with actionable insights for informed decision-making.

Curvelogics Advanced Technology Solutions Pvt Ltd

AI Software Development Intern

December 2023 - February 2024 (3 months)

Trivandrum, Kerala, India

Implement computer vision algorithms for football player tracking and analytics to enable machine identification of objects such as players, goalkeepers, referees, and balls in real-time which enhances game analysis precision, provide valuable insights for coaching strategies and player performance evaluation.
