Java Persistence API (JPA): 1 The Basics
Java Persistence API (JPA): 2 Inheritance and Querying

Parth Sharma

Software Engineer III @ Paypal
Bengaluru, Karnataka, India

Summary

I build systems that handle millions of transactions and don't page you at 3am.

Currently at PayPal, optimizing the Orders API that powers 70%+ of traffic. Before that, built pricing and loyalty platforms at Udaan and payroll systems at SAP.

Things I enjoy: shaving milliseconds off p95, automating the boring stuff with AI, and mentoring engineers.

Things I don't enjoy: legacy code. (But I'll fix it anyway.)

Experience

PayPal

3 years 5 months

Software Development Engineer 3

March 2025 - Present (1 year 4 months)

Bengaluru, Karnataka, India
