Rachit Salhotra

Software Engineer at PayPal | Ex OLA | Dialpad | NSIT
Bengaluru, Karnataka, India

Summary

Backend Software Engineer with 6+ years of experience designing and developing scalable, high-performance systems using Java, Python, and microservices architecture. Proven success leading large-scale projects including cloud migrations, distributed caching, and backend infrastructure modernization across domains like video conferencing, ride-sharing, and real-time data streaming.

Specialized in cloud-native development on GCP and AWS, with deep expertise in Google App Engine, Google Cloud Storage, Google Pub/Sub, Redis, Memcache, Kafka, and SQL/NoSQL databases. Adept at system design, performance optimization, observability (Datadog, Prometheus), and CI/CD pipelines.

Notable achievements include leading an org-wide Python 2 to Python 3 migration, designing a high-throughput GPS ping processor handling 400K events/min, and enhancing product scalability for platforms serving 10,000+ concurrent sessions.

I'm passionate about backend engineering that's fast, fault-tolerant, and future-ready. Looking to bring strong architectural thinking, hands-on coding, and mentorship to impactful engineering teams solving complex backend challenges.

Experience

PayPal

Senior Software Engineer
September 2025 - Present (10 months)
Bengaluru, Karnataka, India

Dialpad

4 years 6 months
Software Engineer 3

April 2023 - September 2025 (2 years 6 months)

Bengaluru, Karnataka, India

As a Software Engineer 3, I've taken on significant technical leadership and mentorship responsibilities, driving critical projects and architectural enhancements. My contributions have consistently focused on improving system scalability, performance, and reliability, alongside fostering cross-functional collaboration and clear system understanding.

Software Engineer 2

April 2021 - April 2023 (2 years 1 month)

Bengaluru, Karnataka, India

Contributed to the Dialpad Meetings team, a video conferencing tool utilizing WebRTC, handling approximately 10,000 calls daily.

Ola (ANI Technologies Pvt. Ltd)

Software Development Engineer 1

July 2019 - April 2021 (1 year 10 months)

Bangalore

Member of the Allocation Team, a high-throughput platform matching customers with suitable cabs using various strategies, filters, and aggregation, processing 2 million bookings per day.

Shriram Pistons & Ring Ltd

Production Quality Engineer

May 2018 - June 2018 (2 months)

Ghaziabad, Uttar Pradesh, India

Major work revolved around analysis of production and manufacturing quality and how to go about improving it.

Hero Cycles Ltd

Manufacturing Quality Engineer

May 2017 - June 2017 (2 months)

Ludhiana, Punjab, India

Major work revolved around analysis of the quality of manufacturing cycles, their production time and processes and how to go about increasing the production and time efficiency.

Education

Delhi University

Bachelor of Engineering - BE, Mechanical Engineering · (2015 - 2019)

Guru Gobind Singh Public School - India

12, High School · (April 2014 - March 2015)

DAV Public School, BRS Nagar

10, School · (April 2000 - May 2014)

Star Plus Convent - Raman Mandi Bathinda

11, High School · (May 2013 - March 2014)
