Software Architecture & Design of Modern Large Scale Systems

Low Level System Design, Design Patterns & SOLID Principles

Shivani Sharma

Software Engineer at PayPal | Google Cloud Certified, Full Stack Developer

Madhya Pradesh, India

Summary

Hi there!

I'm a Software Engineer at PayPal, where I get to work on exciting projects that make a real difference in how people interact with our platform globally. My tech toolbox includes Node.js, JavaScript, TypeScript, and React.js. What really drives me is solving tricky technical puzzles while always keeping the end user in mind.

I'm passionate about creating seamless user experiences and optimizing performance across global platforms. Every day, I get to combine my love for coding with making technology more accessible and user-friendly for people around the world.

I graduated with a Bachelor's in Computer Science from Shri Vaishnav Institute of Technology and Science, Indore.

Always excited to learn new things and connect with others who are passionate about technology and user experience.

Experience

PayPal

Software Engineer

July 2024 - Present (2 years)

Bengaluru

- Implemented edge computing solutions using Fastly's Compute platform to enhance PayPal.com's performance and user experience
- Developed edge-side banner rendering capabilities, enabling dynamic content delivery closer to users and reducing origin server load
- Developed intelligent request routing and redirect handling at the edge layer, improving response times and optimizing traffic flow

- Built caching strategies at the edge for metadata and experiments, reducing latency and origin requests
- Improved user experience by respecting banner dismissal preferences
- Developed intelligent content localization system for sticky regional banners, automatically serving content based on user's geographical location rather than requested page locale, improving readability and user experience
- Enhanced website navigation by ensuring users stay on relevant pages when switching to their local country version, making cross-regional browsing more intuitive and user-friendly

BambooBox

Associate Software Engineer

June 2023 - June 2024 (1 year 1 month)

Bengaluru, Karnataka, India

- I've worked on important projects at BambooBox as a Full Stack Developer. I use Node.js, MongoDB, and JavaScript to bring new ideas and help the company grow.
- Proficiently integrated LinkedIn Lead Sync APIs to capture pertinent information from Lead Generation Forms, encompassing details like Headline, Description, and Landing URL, thus providing insightful lead data derived from LinkedIn Campaigns.
- Developed APIs for Mailchimp, empowering users to execute various operations including audience creation, tag management, and audience information retrieval seamlessly, thereby simplifying the management of email marketing campaigns.
- Implemented a cron job mechanism for hourly data retrieval, ensuring database record consistency across multiple tenants, thereby fostering reliability in data management and guaranteeing seamless operations.
- Demonstrated expertise in developing a JSON rule for Channel Tagging, thereby mastering rule engines and enhancing data management effectiveness through rule evaluation, condition matching, and action execution, ensuring precise data handling.
- Improved website stability and user experience by adeptly resolving frontend and production bugs, showcasing proficiency in bug handling and product understanding, ultimately enhancing customer satisfaction.

Quantiphi

10 months

Framework Engineer

January 2023 - June 2023 (6 months)

Bengaluru, Karnataka, India

- I have received training in multiple cutting-edge technologies, including React, NodeJs, Python, Java.
- Developed an application using React, NodeJs and MongoDB in a team of 4 members where I played a key role in developing key features such as Login, Register, Exporting expenses to PDF format and creating graphical visualizations of expense data.
- Client Project: I served as a full-stack developer on a client project, focusing on creating comprehensive features using React and Node.js technologies.
- Our team played a crucial role in boosting the client's overall productivity by 35%, reducing the time required for media plan creation by 40%, and significantly improving the speed of analyzing necessary actions on media plans by 80%.

Framework engineer intern

September 2022 - January 2023 (5 months)

Bengaluru, Karnataka, India

Tata Consultancy Services

TCS CAMPUS AMBASSADOR

June 2021 - June 2022 (1 year 1 month)

Mindtree

Software Intern
