ANUJ AGRAWAL

Software Engineer II @ Paypal | Ex-Flipkart
Bengaluru, Karnataka, India

Summary

When I was a kid, about 9 years old, Sunita Williams went to Space and that developed my huge Interest in Science, the secrets of the Universe, and technology.

I'm a curious guy who loves to get into the depth of things and try to find out the answers. That was the reason why I opted for Computer Science because I was really curious about how this virtual world works. So as of now, I'm a software developer and I like to build things and I always look for working with people that I learn from and look to contribute to solving problems that are challenging and serves a purpose.

Whenever I'm free I indulge in reading and I always prefer paperbacks over ebooks.

Experience

PayPal

Software Engineer II

June 2024 - Present (2 years 1 month)
