Karan Aggarwal

Software Engineer 2 at PayPal
Greater Bengaluru Area

Summary

Learning Enthusiast.
Adaptive, flexible and team player.

Key Skills: Problem Solving, Data Structures and Algos, Javascript, React, Core Java.

Experience

PayPal

3 years 8 months

Software Engineer 2

April 2025 - Present (1 year 3 months)

Hyderabad, Telangana, India

Responsible for enhancing and maintaining Fraud Protection—PayPal's flagship B2B risk platform—powering merchants like Uber, DoorDash, and KFC, handling 50M+ transactions/day.

Software Engineer 1

November 2022 - April 2025 (2 years 6 months)

Hyderabad, Telangana, India

Led end-to-end design and development of Notification Center for FPA supporting major features like targeted notification for select merchants, alerts and announcements via the centralised admin portal for FPA.

- Enhanced the Reports Tab, used by merchants to visualize transaction trends, generate aggregations over data via custom charts, and download capability in multiple formats including jpeg for charts and excel for data dump.

MIR Digital Solutions

Software Engineer

August 2022 - October 2022 (3 months)

Built a web platform for Timelt, a time-management product for agencies, delivering core features for tracking

contract-worker tasks and hours; contributed to 100% of initial MVP development and enabled the product for pilot merchants.

- Built the Home and Login pages and implemented Stripe's subscription billing, launching a streamlined onboarding flow.

PayPal

Software Engineer Intern

January 2022 - June 2022 (6 months)

Hyderabad, Telangana, India

Built a new UI tab to view and manage end-to-end (E2E) transactions across non-production environments, improving test visibility for internal teams.

- Replaced manual Postman workflows by creating a seamless UI-driven flow for generating payment transactions, reducing setup time and payload errors during testing.
- Added an Insights panel that surfaces decisioning details (approval, rejection, review) and explains the underlying reasoning, improving transparency and accelerating issue triage.

Education

Thapar University

BTech - Bachelor of Technology, Computer Science · (2018 - 2022)
