Structures

Bengaluru, Karnataka, India

Summary

Hello! I'm currently exploring the intersection of finance and technology at M2P Fintech, focusing on enhancing loan management systems through innovative solutions. My journey has also taken me through Rakuten, where I contributed to evolving app architectures and streamlined data migrations. My early experiences at Ushur, where I interned, laid a solid foundation in data privacy and system optimizations. I'm passionate about simplifying complex processes, committed to leveraging technology to improve user experience. Always eager to learn and collaborate, I aim to contribute positively to my team and the broader tech community.

Experience

PayPal

Software Engineer

December 2025 - Present (7 months)

Bengaluru, Karnataka, India

M2P Fintech

Software Engineer

February 2023 - November 2025 (2 years 10 months)

India

- Developed systems for Loan Management (LMS), Loan Origination (LOS), and Microfinance (MFI) using Java Spring Boot, MySQL, and Angular.
- Designed and implemented a framework for Secured Loans, enabling lenders to provide loans backed by securities (stocks, MFs, etc.). Integrated CMOT APIs to sync NAVs and calculate asset values in real time.
- Led multiple third-party integrations, including E-NACH for automated repayments, credit bureau checks, KYC APIs for data validation, and e-sign capabilities for digital document signing, streamlining loan processing and enhancing platform efficiency.

- Improved efficiency in repayment collections by developing a system to manage loan officers' leaves and assign replacements for field visits, ensuring uninterrupted operations.
- Collaborated with clients and cross-functional teams (Product, Sales, CSO) to drive product enhancements that met and exceeded business needs.
- Served as a critical member of the L3 support team, stabilizing systems and ensuring timely releases. Introduced runbooks to minimize repetitive work on recurring issues and implemented structured handovers to streamline the overall L3 process.

Rakuten India

2 years 2 months

Software Engineer 1

June 2022 - February 2023 (9 months)

Bengaluru, Karnataka, India

- Contributed to transitioning the R-Pay app architecture from a monolithic structure to microservices, using Java J2EE, Spring Boot, Docker, Kubernetes, Payara Servers, and Gatling, enhancing scalability and performance.
- Developed a critical API abstraction layer with feature flags in Redis for seamless service fallback, ensuring uninterrupted migration between architectures.
- Led the migration from Oracle to MySQL, ensuring data integrity and minimal downtime throughout the process.
- Refactored batch processes to adapt to the microservices architecture, optimised DB queries and improved code efficiency.
- Managed production releases, overseeing canary releases and staged deployments to ensure smooth, low-risk rollouts to prod and monitored post-production performance using Kibana, Grafana and New Relic.
- Developed a performance testing framework with Gatling, optimised deployment strategies based on the test results.

Associate Software Engineer

January 2021 - June 2022 (1 year 6 months)

Bengaluru, Karnataka, India

Ushur

SDE Intern

January 2020 - June 2020 (6 months)

Bengaluru, Karnataka

- Developed a Text Anonimizer Tool to anonymize personal data to a generic representation to avoid security and privacy issues.
- Built Centralized Logging infrastructure using EFK stack (ElasticSearch, Fluentd, Kibana) to help visualise bugs in an efficient way.
- Implemented REST APIs using JAX-RS, Java slf4j and logback frameworks.
- Automated Data driven API tests with REST-Assured and test-ng framework.

Ayotta Technologies

Summer Intern

June 2018 - July 2018 (2 months)

bangalore

Education

PES UNIVERSITY, BANGLORE

Bachelor of Technology - BTech, Computer science and engineering · (2016 - 2020)

Govt. Pre University College Belgaum

PUC · (2014 - 2016)
