Ratish Agarwal

Software Development Engineer 3 at PayPal
Bengaluru, Karnataka, India

Summary

Strong engineering professional, quick learner with strong analytical and problem-solving skills who loves a challenge. Always keen to learn and try out new technologies, philosophies, interpersonal skills and productivity hacks. Experienced in building large scale platforms with a passion for innovating on developer productivity, effective collaboration within teams and a focus on delighting customer with quality products while adapting to agile principles and growing in high performance - self sustaining teams.

Experience

PayPal

7 years 10 months

Software Engineer 3

June 2023 - Present (3 years 1 month)

Bengaluru, Karnataka, India

- Empowered individuals & teams: Mentored 3 junior engineers, fostering their professional and personal growth within the "One Team, One Family" principle.
- Technical Expertise: Recognized as the go-to mentor for new joiners below Senior Manager level.

• Leadership: Led a 9-person team to design, develop, and deliver critical business requests across the organization, ensuring high quality.

- Innovation Champion:

Designed and implemented a highly scalable "Actions Platform" to increase user engagement and transaction value.

Developed an internal tool improving team productivity by 80%, reducing workload from 16 hours/month to ~4 hours. Presented this innovation to 400+ engineers.

- Cost Optimization: Leading a team to deprecate legacy services, resulting in projected annual cost savings of ~\$100,000.

Software Development Engineer 2

February 2020 - June 2023 (3 years 5 months)

Bengaluru Area, India

- Optimised Activity backend on Actions computation and serving to reduce 1B daily downstream calls - a reduction of 91%. This led to savings of 6B Db calls per day, saving of USD 480,000 per year and 95p app latency improved by 40%.
- Optimised the platform by enhancing current capabilities to fetch RAW data from Database to publish data to clients for publishing notifications thereby deprecating two applications in the platform leading to a cost reduction of \$100000.
- Optimised the activities core APIs by scaling down duplicate and unnecessary calls to other APIs resulting in downstream call reductions by 100M per day.
- Designed and executed a pipeline facilitating 400 million+ customers to see their transactions in PayPal Activities in sub-second latency.
- Integrated the Cryptocurrency Solution enabling 100 million+ consumers across the EMEA and North America to view their crypto trade transactions in PayPal Activity.
- Integrated QR code payments solution in PayPal activities for 10 million customers across 28 countries worldwide to provide contactless payments experience to combat spread of COVID-19.
- Led a team of 3 to implement a functional testing suite which increased developer productivity by 10+ hours per week.
- Co-ordinated with the stakeholder team to design the Dispute Fee feature in PayPal leading to a revenue growth of \$50 million generated by penalising disputes against adversely rated merchants worldwide.

Software Development Engineer

September 2018 - February 2020 (1 year 6 months)

Bangalore

- Collaborated with cross vertical teams and stakeholders to design the Bill-Pay feature in PayPal empowering 10 million+ consumers to automatically pay their utility and other services bill using one touch payments.
- Enhanced the PayPal Activities customer facing APIs schema for easier integration by internal and external clients for seamless and fast access to over 300 million+ transactions daily and 2 billion+ transactions overall.
- Integrated Xoom transactional activity into PayPal allowing 12 million+ partnered merchants and consumers to access and utilise PayPal supported features.
- Implemented various features which allows PayPal Customers to view and search their activity history with added filtering capabilities.

Temenos
Software Development Engineer
