Machine Learning Bootcamp

Aman Budhrani

Software Development Engineer at Amazon | Ex Samsung |
Backend Developer | DUHacks2.0 Runner Up | HackNITR 4.0
Finalist | IIITG CSE'24

Hyderabad, Telangana, India

Summary

Greetings! I'm Aman, a dynamic tech enthusiast and aspiring entrepreneur driven by a relentless passion for innovation. Armed with a Bachelor's in Computer Science and Engineering from IIIT Guwahati, I specialize in crafting intelligent solutions that bridge the gap between cutting-edge technology and real-world challenges. From engineering APIs for virtual fashion try-ons to pioneering a groundbreaking drone solution for precise garbage hotspot identification, I thrive on transforming conceptual ideas into impactful projects.

My proficiency spans a list of languages and frameworks, including Java, Python, Spring Boot, and Flask. Fueled by a commitment to community, I've contributed to fostering collaboration through projects like InkWell, a dedicated blogging platform that seeks to optimize the digital experience for college students.

Beyond the realm of code, I'm deeply intrigued by the dynamic world of business and entrepreneurship. My interests extend to understanding market dynamics, exploring innovative business models, and envisioning how technology can drive transformative change. Whether engaged in hackathons, mastering new technologies through online courses, or strategizing for entrepreneurial ventures, I am always eager to explore the endless possibilities at the nexus of technology and business. Let's connect, collaborate, and explore the exciting intersections of technology, innovation, and entrepreneurship!

Experience

Amazon

Software Development Engineer

September 2025 - Present (10 months)

Hyderabad, Telangana, India

Samsung R&D Institute India - Bangalore

Software Engineer

July 2024 - August 2025 (1 year 2 months)

Noida, Uttar Pradesh, India

- Developed and maintained the Samsung TV+ app, serving 88 million monthly users, using C# and .NET.
- Managing cloud-native solutions with AWS EC2, S3, Kubernetes, Athena, CloudFront, VPC and DynamoDB, ensures efficient data retrieval, high availability, fault tolerance, and cost efficiency.
- Collaborating with cross-functional teams to deliver high-quality features and ensure seamless user experience.

MAQ Software

Associate Software Engineer

December 2023 - May 2024 (6 months)

Noida, Uttar Pradesh, India

- Designed and implemented end-to-end real-time analytics solutions on Power BI using Azure Data Explorer, Azure Databricks, Microsoft Fabric, Azure Data Factory, Kafka, and Kusto Query Language.
- Implemented optimization strategies, achieving a 50% cost reduction and 30% latency improvement.
- Migrated client's Snowflake architecture to Azure in an agile environment, improving performance and scalability.

Education

Indian Institute of Information Technology Guwahati

Bachelor of Technology - BTech, Computer Science · (December 2020 - May 2024)
