Nikhil Arya

SDE - III, Bar Raiser @Amazon
Hyderabad, Telangana, India

Summary

Talented Back-end developer adept at contributing to highly collaborative work environment, finding solutions and determining customer satisfaction. Designed and developed various applications across multiple APIs, third-party integrations and databases. Passionate and hardworking with penchant for developing customized interfaces that factor in unique demands for accessibility, reachability and security.

Experience

Amazon

3 years 10 months

Senior Software Development Engineer

October 2025 - Present (9 months)

Hyderabad, Telangana, India

Software Development Engineer

September 2022 - September 2025 (3 years 1 month)

Hyderabad, Telangana, India

ServiceNow

3 years 3 months

Software Engineer

September 2020 - September 2022 (2 years 1 month)

Hyderabad, Telangana, India

Worked on the following projects under this role ->

1. Service Account Handling -

Created a self-service workflow solution to automate the provisioning and modification of Service Accounts. Helped in reducing the manual DevOps activities. Requestors have access to specify the roles/access they want for their accounts. The automation is smart enough to figure out the right roles following the Principle of Least Privilege. All requests will go for validation/ approvals. Admins can roll back all the changes done by the automation with just 1 click.

2. Release Management Plugin -

Did a POC on the existing Release Management plugin to manage the various tasks involved while deploying CITRUS releases. This includes enhancing the plugin to handle different Releases (Major/Minor), integrate with DevOps, take necessary approvals and track the build/test/deployment phases of the release.

Associate Software Engineer

July 2019 - August 2020 (1 year 2 months)

Hyderabad Area, India

Worked on the following projects under this role ->

1. Access Management

Provide individuals/groups with the appropriate level of permissions, basis on their business use case to one of the most high-risk instances in ServiceNow. It also involves structuring the permissions following the Least Privilege principle. This requires a deep understanding of the complex protection policies employed at the instance level by ServiceNow.

2. PAGA

Developer for an innovative application "Persona Access Granting Automation" which allows application owners to manage the access/security of their applications in a more intuitive, flexible and efficient manner. Helped reducing the manual DevOps activities by 60%. Product and effort received VP level recognition.

3. DevOps-CITRUS Configuration (NowOnNow Initiative)

Configured the DevOps product to align with our existing CITRUS Deployment processes and make the process more streamlined and efficient. Achieved zero-touch for sub-production deployments. Worked for 6+ months with the product team to provide feedback on the existing features and and give requirements for new features. DevOps expected to generate a revenue of 250,000 \$ in 2020.

Amazon

Software Development Engineer - Summer Intern

May 2018 - July 2018 (3 months)

Hyderabad Area, India

SOP Automation - Worked on automating some pre-defined SOPs for my team.

Implementation: This involved downloading multiple (9-14) compressed log files (each >400 MB) in chunks over a server, decompressing those chunks, searching for the root cause (all done parallelly in threads), then updating the root cause on the corresponding ticket and closing it.

Result: Reduced the time taken to solve each ticket (approx 15 mins per ticket) to <1 min per ticket.

Education

Indian Institute of Information Technology, Kota

Bachelor of Technology - BTech, Computer Science · (2015 - 2019)
