One size does not fit all: Predicting product returns in e-commerce platforms

Tanuj Joshi

SDE II @ Amazon | IIT Kharagpur Alumni | Ex-SAP | Ex-Flipkart
Bengaluru, Karnataka, India

Summary

IIT Kharagpur pass out with over 6+ years of rich, product development experience in Agile (Scrum methodology) based teams; expertise in Cloud Native Development, Backend Development and API Design.

- Possesses strong foundational knowledge in Object-Oriented Design Principles, Data Structures and Algorithms.
- Expertise in tackling ambiguity and breaking down complex problems to solve them.
- Experience in Microservice / Webservice Development and Cloud Native API design.
- Efficient in Java Spring Boot, including SQL data queries.
- Efficient in Native AWS technologies.
- Experience in integrating, designing and developing Scalable and Highly Available services.
- Experience in continuous integration (CI) tools like Jenkins.
- Additionally, have exposure in Machine Learning / Data Science.
- Successfully delivered quality code with Automated tests from POC stage to production.

Experience

Amazon

Software Development Engineer II

November 2021 - Present (4 years 8 months)

Bengaluru, Karnataka, India

Amazon Payment Products

- Led a team of 3 junior Software Development Engineers (SDEs) to solve complex technical challenges, delivering multiple solution approaches and decision matrices for optimal results.
- Spearheaded the development of key features for a Japanese payment method, driving significant enhancements to the payment system which impacts 8M customers.

- Successfully led the PrimeDay 2023 event for Japanese payment methods, coordinating efforts across 3 teams and managing 7 payment methods, achieving zero downtime and no customer impact.
- Presented an automation idea at Amazon DevCon 2023 for Amazon Payments' Fraud Detection service, reducing manual processing time from hours to minutes and significantly improving operational efficiency.
- Designed and implemented innovative solutions by working with 10+ different teams with a focus on reducing technical debt, meeting critical program delivery timelines.
- Improved visibility of the payment product offers in Japan by surfacing it on product detail page.
- Led Operational excellence for 3 teams managing 7 Payment Methods to reduce operational load while maintaining high customer experience bar.
- Created a customized Amazon Q LLM model on team's codebase to work improve code and unit test suggestions based on team's coding style.

SAP Labs India

Software Engineer

July 2018 - November 2021 (3 years 5 months)

Bengaluru Area, India

SAP Health Engineering

- Evaluated the performance and scalability of SAP Health Patient Accounting microservices, delivering an improved user experience during the Beta rollout.
- Improved the scalability and performance of services through app profiling and instrumentation in Java Spring Boot.
- Used technologies such as Java , Spring Boot , Maven , Cloud Foundry , HANA , SQL , Postman , jMeter , jConsole , Git / Github , Jenkins , REST and System Design .

Mobile SDK Team (SAPML Framework) - SAP Cloud Platform Mobile Services

- Developed and implemented a production-ready feature to auto-update machine learning models using TDD, improving the reliability of the App.
- Built an image recognition pipeline with automatic model retraining, ensuring continuous model updates without user intervention.
- Delivered a CodeTalk on SAP's YouTube channel to demonstrate text recognition features using SAPML.
- Used technologies such as Swift , GCP , Git / Github , TDD (Test Driven Development) , REST , API Design .

RabbitMQ As a Service Team - SAP Cloud Platform Core

- Ensuring High Availability of RabbitMQ as a service.
- Optimizing HAProxy for the RabbitMQ instance cluster to reduce overall downtime experienced by the user.
- Used technologies such as RabbitMQ , Shell Scripting , Cloud Foundry , Docker .

Flipkart

Data Science Intern

July 2017 - August 2017 (2 months)

Bengaluru Area, India

- Extraction (using Hive queries), Cleaning, Analysis of the dataset. Devised a preliminary clustering algorithm to predict whether a garment would be returned for size/fit issue before the purchase is made.
- Used technologies such as Python , matplotlib , numpy , scikit-learn , Machine Learning / Data Science .

Education

Indian Institute of Technology, Kharagpur

Master of Technology - MTech, Computer Science and Engineering · (2016 - 2018)

VISHWAKARMA GOVERNMENT ENGINEERING COLLEGE,
CHANDKHEDA,GANDHINAGAR 017

Bachelor of Engineering (B.E.), Computer Engineering · (2010 - 2014)

Sheth C.N. Vidhyalaya

· (1998 - 2010)
