Parth Mangal

Software Development Engineer II at Blinkit | Backend Systems |
Distributed Systems | AdTech | Go · Python · Kafka
Gurugram, Haryana, India

Summary

Software Development Engineer II at Blinkit, building scalable backend systems and data platforms in the AdTech space. Currently leading development of MediaMax — Blinkit's off-platform advertising platform on Meta and Google — and owning Brand Central, a self-serve on-platform ads product used by Blinkit's brand advertisers. My work spans distributed Go services, Kafka-based event streaming, Airflow ETL pipelines, and Python/FastAPI backends with analytics dashboards. Previously at Zomato, I built Social Ads end-to-end — Zomato's performance advertising product on Meta — including campaign management, dining catalog pipelines, audience segmentation, and full-funnel attribution tracking. Before that, at Gameskraft, I engineered backend microservices and Apache Flink streaming pipelines for Pocket52, one of India's largest online poker platforms. Strong in: Distributed Systems · Backend Engineering · Data Pipelines · System Design · Go · Python · Kafka · Airflow · Microservices Open to: Challenging backend/platform engineering roles at top product companies.

Experience

Blinkit

Software Development Engineer II
July 2025 - Present (11 months)
Gurugram

Leading backend development of MediaMax, an off-platform advertising platform enabling Blinkit brands to run performance campaigns on Meta and Google. Built core backend in Go with gRPC APIs and Kafka-based event streaming.

Key contributions:

- Engineered catalog service and Airflow ETL pipelines for real-time product catalog sync and update event processing, ingesting Blinkit's inventory signals for product-level ad targeting.

- Owned Brand Central (Python/FastAPI) — Blinkit's self-serve on-platform advertising product; built APIs for campaign lifecycle, audience targeting, bid optimization, and performance reporting.
- Built Brand Insights analytics dashboard exposing SOV, sales, market share, and ATC metrics to brand advertisers via async Celery pipelines and query-optimized aggregations.

Zomato

Software Development Engineer

August 2024 - July 2025 (1 year)

Gurugram

Built and scaled Social Ads, Zomato's off-platform performance advertising product on Meta Ads. Owned end-to-end backend — campaign creation, credit line management, audience management, catalog pipelines, attribution, and reporting.

Key contributions:

- Maintained and enhanced delivery and dining catalog pipelines, processing restaurant menu and dining events from Zomato's event registry to keep ad catalog data synchronized on Meta.
- Designed audience segmentation system with configurable templates for targeting cohorts (dining engagers, transactional users, city-based segments); built parallel audience upload pipeline to Meta Ads API.
- Built attribution system mapping dining and menu open events to Meta Conversions API, enabling full-funnel conversion tracking for restaurant advertisers.

Gameskraft

1 year 7 months

Software Engineer

July 2023 - July 2024 (1 year 1 month)

Bengaluru

Engineered backend systems for Pocket52, one of India's leading online poker platforms.

Key contributions:

- Built and scaled microservices for Rewards, Royalty Rewards, Referrals, and Affiliates (Node.js/TypeScript) with idempotent, high-concurrency transaction workflows.

- Shipped Hybrid Lobby and Private Tables features across game server and React Native client.
- Led API gateway layer revamp improving system throughput and reducing API latency; built Apache Flink streaming jobs for real-time event processing and player analytics pipelines.

Software Engineer Intern

January 2023 - June 2023 (6 months)

Bengaluru, Karnataka, India

Gap Inc.

Software Engineer Intern

May 2022 - July 2022 (3 months)

Hyderabad, Telangana, India

- Collaborated with the Inventory Capacity Management team to optimize supply planning strategies.
- Built a data flow application using Kafka for real-time inventory updates of new items across online platforms.
- Conducted end-to-end system testing, improving the accuracy of online inventory visibility.

Purple Tutor

Frontend Developer

June 2021 - July 2021 (2 months)

- Developed web applications using HTML, JavaScript, and React.js alongside a team of 2 UI developers.
- Collaborated with the Senior Project Manager to gather requirements and deliver front-end features.
- Improved usability and responsiveness of the company's educational platform for students and teachers.

eLDA Lab

React Developer

March 2021 - April 2021 (2 months)

Built a responsive front end of e-Learning and Data Analytics Lab by IIIT Kota, it is now live and managed with more than 20K users and over 5K hours of content streamed per month.

Indian Institute of Information Technology Kota

Frontend Developer

January 2021 - March 2021 (3 months)

- Designed and Implemented a completely responsive front end for IIIT Kota's website, enhancing user-experience.
- Optimised website's data-fetching for better performance. And was able to achieve high traffic - from 8K to 20K+ hits per month.

Education

Indian Institute of Information Technology Kota

Bachelor of Technology - BTech, Computer Engineering · (2019 - 2023)

Kids Paradise Sen Sec School

10+2 · (2005 - 2019)
