Shivam Agrawal

SDE-2 @ Blinkit || Ex - Amazon, Hasher || KIIT 2022
Gurugram, Haryana, India

Summary

I'm a Software Engineer and a continuous learner, passionate about leveraging technology to solve real-world problems. With strong expertise in Java, Spring Boot, SQL, Data Structures, and Algorithms, I thrive in building robust, scalable solutions.

Recently, I've started gaining hands-on experience with Golang, focusing on developing personalization and recommendation services. This journey is enhancing my ability to build efficient, high-performance systems by leveraging data-driven insights, machine learning algorithms, and user behavior analytics. I'm always open to discussions and collaborations to deepen my understanding of scalable recommendation architectures and data science best practices.

Beyond coding, I have a keen interest in photography, capturing the world from unique perspectives.

Let's build, create, and learn together! Feel free to connect with me here on LinkedIn.

Experience

Blinkit

1 year 11 months

Software Development Engineer II

January 2025 - Present (1 year 5 months)

Gurugram, Haryana, India

Software Development Engineer

July 2024 - December 2024 (6 months)

Gurugram, Haryana, India

Personalising Blinkit for all of you

Amazon

Software Development Engineer

July 2022 - July 2024 (2 years 1 month)

Hyderabad, Telangana, India

Team: Alexa Data Services

Real-Time Data-Driven Microservices Development:

- Designed, developed, and maintained a real-time, data-driven microservice to process diverse events generated during annotation, transcription, and other activities performed by Data Associates for Alexa data.
- Ensured high performance and scalability for seamless ingestion and processing of real-time event streams.

Demand Translator System for Human-in-the-Loop Operations:

- Engineered a robust Demand Translator system that evaluates multiple parameters to estimate the time and cost required for operations such as annotations, transcription, and more.
- Integrated the system into a comprehensive Human-in-the-Loop (HIL) ecosystem, addressing key challenges like:
 - Determining headcount and effort estimates based on task complexity and domain expertise.
 - Allocating tasks efficiently to optimize performance and resource utilization.
 - Forecasting resource availability and ensuring timely project delivery.

Scaler

Teaching Assistant

June 2022 - October 2022 (5 months)

HashedIn

Software Engineer Associate

January 2022 - June 2022 (6 months)

Bangalore Urban, Karnataka, India

Project 1

- Care Conductor: remote patient monitoring and digital care product used for post-discharge care of the patients.
- Responsible for migrating the existing CodeBase from GCP to AWS.

Project 2

- Food@Workplace: a responsive web application that helps the employee to place the food order via an E-Menu accessible directly through the website or QR Codes.

- Developed the Backend for the web app using SpringBoot

Onsitego

Software Engineer

May 2021 - August 2021 (4 months)

Bangalore Urban, Karnataka, India

Developed Google OAuth 2.0 Integration for Secure Employee Login in CRM Portal

- Recognized the need for a more secure authentication mechanism to prevent unauthorized access by external parties or ex-employees.
- Integrated Google OAuth 2.0 into the CRM portal to authenticate users with their corporate Gmail accounts.
- Developed a feature that ensures only employees with an active Onsitego email address are granted access to the CRM Portal.
- Reduced the risk of unauthorized access by ensuring that only verified employees could log in, utilizing their corporate credentials.
- Designed a seamless login flow where employees are redirected to Google's authentication page, ensuring that sensitive account details are securely shared and validated.

HighRadius

5 months

Software Developer

April 2021 - May 2021 (2 months)

Full Stack Developer

January 2021 - March 2021 (3 months)

Worked on AI-Enabled FinTech B2B Sales Invoice Management Application.

- Built an ML model to predict delays in clearing date of account receivables from past records.
- Deployed the project using Java and provided the user interface.
- Prepared dashboard using ReactJS and provided the users with many functionalities.

Education

Kalinga Institute of Industrial Technology, Bhubaneswar

Bachelor's degree, Computer Software Engineering · (2018 - 2022)

Delhi Public School, Ruby Park

· (2016 - 2018)
