Priyanshu Shekhar Singh

SDE-2 @ Blinkit | Ex-PocketFM
Bengaluru, Karnataka, India

Summary

I'm a Software Engineer with over 3+ YOE in building and optimizing applications. Currently at Pocket FM, I've worked on internationalizing the app for Spain and Germany and improving its performance by reducing latency and ensuring data accuracy.

I'm skilled in technologies such as Go, Python, Kafka, Redis, MySQL, ScyllaDB, Django, Flask, and Docker, and I'm always eager to tackle new challenges and enhance user experiences.
4-star on CC and a Specialist on CF.

Experience

Blinkit

Software Development Engineer 2
June 2025 - Present (1 year)
Bengaluru, Karnataka, India

Pocket FM

3 years 1 month

Senior Software Engineer

May 2025 - May 2025 (1 month)

Software Engineer

May 2023 - April 2025 (2 years)
Bengaluru, Karnataka, India

Built an in-memory caching layer, reducing Redis usage and saving approximately \$2,000 in monthly infrastructure costs.

Optimized MongoDB clusters, achieving a cost reduction of around \$1,500 by reconfiguring shard utilization and query patterns.

Led the internationalization and launch of the Pocket FM app in Spain and Germany, to support region-specific configurations and optimization for local markets, which increased daily revenue by 4%.

Built the content A/B experimentation framework from 0-1, resulting in impactful insights to optimize story plot decisions.

Software Engineer Intern
May 2022 - April 2023 (1 year)
Bengaluru, Karnataka, India

Led the development for search using Elasticsearch, implementing indexing and caching strategies to improve the search experience for Pocket Novels and the CMS. This resulted in a notable increase in search efficiency and user satisfaction by 3%

Designed and implemented an image optimization service to reduce CDN costs by compressing and resizing images, saving 400\$ per month

Led the development of RBAC in the CMS, cutting down content leak incidents to only 0.3% by establishing clear access permissions and user roles

Optimized CMS Feed APIs by improving database indexing and using Redis Sorted Sets for caching, which reduced latency by 42% and increased API throughput

Worked on a service to allow the clients to version control the schema for SQL databases using Migrations

DataToBiz
Full-stack Developer
March 2022 - May 2022 (3 months)
Chandigarh, India

Developed a User Behavior Analytics system for PrepAI to track where users come from, making it easier to analyze metrics like conversion rates, CTR, and user engagement

Created responsive front-end interfaces for machine learning models using React.js

Set up a service to send email notifications to users who signed up on the platform using Flask and SMTP by 20%

Developed dynamic front-end interfaces using React.js, enhancing user experience and data interaction.

MIRROR SCORE

Software Engineer Intern

January 2022 - April 2022 (4 months)

New Delhi, Delhi, India

- Designed and scaled a classroom module API using Django, supporting 45,000 active users.
- Optimized APIs for high concurrency, ensuring seamless content delivery and notifications.

Education

Techno India University

Bachelor's degree, Computer Science
