Top Skills

PyTorch
Speech Processing
Natural Language Processing (NLP)

Certifications

Machine Learning Basics
Nanodegree
C++ for C programmers - Online Course
Kenyon – IITM Writing Workshop (Scientific Writing)
Advanced Python
Advanced Problem Solving

Honors-Awards

Project - LUCID
C - Programming
Paper Presentation - nTech-India, Nvidia
Seminar on Parallel Programming and CUDA
GATE

Publications

Single Trial P300 Classification Using Convolutional LSTM and Deep Learning Ensembles Method
Study and Analysis of Human Attention using Odd-Ball Paradigm
A Common Spatial Pattern Approach for Classification of Mental Counting and Motor Execution EEG

Raviraj Joshi

Senior Data Scientist @ Nvidia | LLMs | Speech AI | Ex Flipkart |
Indic NLP | MahaNLP
Bengaluru, Karnataka, India

Summary

A system programmer by heart, now a deep learning enthusiast. I strongly believe that if we work hard enough, we will enjoy any work thrown at us. Currently working on building Nemotron SLMs / LLMs for Nvidia.

Experience

NVIDIA

Senior Data Scientist
December 2023 - Present (2 years 7 months)
Pune, Maharashtra, India

L3Cube Labs

Head Mentor
June 2013 - December 2024 (11 years 7 months)

As part of L3Cube Labs, I mentor student groups for their final-year projects.

Details of the annual mentorship program and past projects can be found here:
<https://ravirajoshi.medium.com/introduction-to-l3cube-48c265f37385>

Flipkart

5 years 3 months
Senior Data Scientist
March 2023 - November 2023 (9 months)
Bengaluru, Karnataka, India

I was leading the NLP Foundation models group which was responsible for creating internal custom LLMs. We delivered the initial version of custom LLMs based on Llama 7B, 13B, and 70B for a variety of e-commerce tasks like QnA (Chat Assistant), summarization, aspect extraction, and rich product description generation.

Also, worked as a part of the Flipkart Voice Team, working on state-of-the-art ASR and TTS models for Indic languages in the e-commerce domain.

Data Scientist 3

October 2021 - February 2023 (1 year 5 months)

Bengaluru, Karnataka, India

Data Scientist 2

July 2020 - September 2021 (1 year 3 months)

Software Development Engineer (ML) 2

September 2018 - June 2020 (1 year 10 months)

upGrad

Upgrad Xpert

July 2020 - May 2021 (11 months)

Bengaluru, Karnataka, India

I have been providing weekend industry-oriented coaching to the Upgrad SGC groups. The students were pursuing a 'PG Diploma in Data Science' and the program was affiliated with IIIT-Bangalore.

Liv.ai

Research Software Engineer

June 2018 - September 2018 (4 months)

Bengaluru Area, India

Acquired by Flipkart.

Indian Institute of Technology, Madras

Teaching Assistant

July 2016 - May 2018 (1 year 11 months)

Chennai Area, India

Teaching Assistant for Deep Learning Course, IIT Madras (January 2018 - May 2018).

Teaching Assistant for Programming and Data Structures Lab, IIT Madras (August 2017 - November 2017).

Teaching Assistant for Object Oriented Programming Lab, IIT Madras (January - April 2017).

Teaching Assistant for Introduction to Programming Lab, IIT Madras (August - November 2016).

NVIDIA

System Software Engineer 2

June 2012 - November 2015 (3 years 6 months)

I was a part of Nvidia Control Panel team(CPL-GPU division) wherein I worked on service component of Nvidia Control Panel for Windows operating system. From programming perspective, I got the experience to work on C++ based COM components(DLL's). Specifically, I have experience of working on C++ + stl, windows api's, CCD api's(Configuring connected displays), SetupApi, NvApi, boost C++ template library and interacting with kernel mode display driver component.

I was responsible for developing features, providing bug support and triaging issues from CPL side for features like changing display configuration, display config persistence, surround, mosaic, color, optimus, etc. Simultaneously I was completely responsible for the customer issues and notebook issues for my module.

I was a part of externally visible driver features like DSR(dynamic super resolution), FRL (Frame rate limiter), GSync, Pan-Scan Clone, Dynamic range/BPC and other internal features.

I also worked on Win10 related enhancements, accounting for Win10 related CCD api spec changes and other changes required to ensure smooth functioning of my module on Windows 10.

I also got chance to develop tools that would help QA validate features and use them for automated testing which were again written in C++.

During my tenure I also got the opportunity to train NCG(new hire) and a chance to conduct sessions on COM for teammates.

Amdocs

Intern

January 2011 - July 2011 (7 months)

Worked as a part of PICT-Amdocs Innovation Lab on SerMon(A web based remote server monitoring tool)

Education

Indian Institute of Technology, Madras

Master of Technology (M.Tech.), Computer Science · (2016 - 2018)

Pune Institute of Computer Technology

Bachelor of Engineering (B.E.) · (2008 - 2012)

Trinity high School, Akurdi
