LEKHANA RAJA SOMIDI

SDE 2 at Microsoft

Hyderabad, Telangana, India

Summary

Experienced Software Engineer | Product Development | Java | Spring | Database | AWS| Driven by Innovation

Hello! I'm a Product Development Engineer based in Hyderabad, India. With over 5.5 years of experience in the software development industry, I thrive on building innovative solutions and pushing the boundaries of what is possible.

My expertise lies in the entire software development life-cycle, where I have gained a deep understanding of delivering high-quality projects on time. I excel as a hands-on developer and take pride in mentoring and guiding fellow developers to achieve project milestones and produce top-notch code.

As a problem solver at heart, I possess a keen analytical mindset that allows me to tackle complex challenges head-on. I am dedicated to delivering exceptional results while adhering to tight schedules, ensuring impeccable code quality in the process.

My technical skills include Java, SQL, Cassandra, and the Spring framework. I have hands-on experience with various Java technologies such as Spring Core, Spring MVC, Hibernate, and Spring Boot. I am also well-versed in working with databases like MySQL, PostgreSQL, and Cassandra. Additionally, I have expertise in utilising tools like Jenkins, Git, Kafka, Docker, Keycloak, and AWS to streamline development processes and enhance project efficiency.

Throughout my career, I have had the opportunity to work on diverse projects that have sharpened my abilities. At Phenom, Hyderabad, I developed a platform automating cross-product integrations, reducing efforts by up to 40%. I also implemented a user management system using Keycloak IAM, enabling seamless single sign-on across all organisational applications.

During my tenure at Vassar Labs, I played a key role in designing and developing robust solutions to meet client requirements. I have led back-end engineering projects using Java, Spring MVC, Hibernate, and MySQL. Additionally, I have extensive experience in building and consuming RESTful APIs, web services, and Micro-service architectures.

I hold a Bachelor of Technology in Computer Science.

Passionate about innovation and committed to delivering exceptional results, I am eager to contribute my expertise and collaborate with a dynamic team. If you are seeking a Software Engineer with a proven track record of delivering high-quality projects, let's connect and explore opportunities. Contact me at lekhanarajasomidi@gmail.com.
