Sakshi Aggarwal

SDE II at Microsoft | Ex-Flipster
Jind, Haryana, India

Experience

Microsoft

Software development engineer II
June 2024 - Present (2 years 1 month)
Bengaluru, Karnataka, India

1. Calendar service data pipelines :

Modernized calendar data pipelines using Microsoft Azure Pipelines and C# to enable real-time tracking of MAU, DAU, and WAU customer metrics, empowering product teams with actionable insights for strategic investment decisions. Tech Stack : C#, Azure data pipelines, Mysql, PowerBi

2. Framework for Unit test cases generation :

Worked on a cross-language framework to automatically generate unit test cases for any repository, project, or file, significantly reducing manual effort and enhancing test coverage across diverse codebases. Tech Stack : Python, gpt-4o, Astred

3. Microsoft Places (0->1 project) :

Worked on key features of Microsoft Places(0->1 project), enabling secure, low-latency space usage analytics for facility admins through Exchange data integration. Tech Stack : C#, Azure data factory

Flipkart

4 years 1 month

Software development engineer II
March 2022 - June 2024 (2 years 4 months)
Bangalore

1. Aerospike data population revamp :

To serve the top 3 most helpful reviews, average product ratings and average aspect rating on the Flipkart product page, data needs to be precomputed and stored in a distributed scalable datastore for which Aerospike is being used. Today data is present in denormalized form which leads to duplication of data. Also the time required as of today to convert user pivoted review data to product pivoted data is very much. To resolve these issues normalization

of data and migration of offline jobs to gcp is done. Tech Stack : JAVA, Spring boot, Aerospike, Mysql, Avro compression

2. Badges for reviewers : Top reviewers of all categories are given badges like Tech guru, Fashion guru, decor guru etc. Top flipkart reviewers are also given badges as gold reviewer, silver reviewer, bronze reviewer.

Tech Stack : JAVA, Spring boot, Aerospike, Mysql

Software Developer Engineer

June 2020 - March 2022 (1 year 10 months)

1. Grocery tab besides Flipkart : On opening the app there

is a grocery tab that comes besides Flipkart. Tech Stack : JAVA, Spring boot

2. Grocery decision engine : Developed a rule engine to decide which experience to show to the user during pre-order journey on grocery. Multiple experiences include nudging users to buy more, making them aware of offers they would be getting on buying more, switching to a higher quantity of the same product to save more etc.

Tech Stack : JAVA, Dropwizard, DKV, Drools

Education

National Institute of Technology Kurukshetra

Bachelor of Technology - BTech, Information Technology · (2016 - 2020)
