Anku Khandelwal

Software Development Engineer at Blinkit
Bengaluru, Karnataka, India

Experience

Blinkit

Software Development Engineer 2
November 2023 - Present (2 years 7 months)
Gurugram, Haryana, India

- Owned and scaled multiple customer support micro-services (CRM, chatbot, resolution engine, fraud detection) handling 270k–360k RPM with p95 <80ms, ensuring reliability during peak sale events.
- Designed a rule-based auto-resolution engine processing 100k+ complaints/day, autonomously issuing #10L+ refunds/day with p99 <4ms latency and strict safety guardrails.
- Led backend architecture and integrations for Open-Box Delivery, improving trust for high-value SKUs and driving 35% conversion uplift.
- Architected post-delivery service flows (installations & add-ons), coordinating multi-party async pipelines with high reliability.
- Revamped observability and alerting (Prometheus, alert redesign), cutting false positives by 60% and improving on-call signal quality.
- Built real-time AI complaint analysis pipelines (media, chats, call logs, PDP data), reducing manual audits by 60%.
- Took ownership of L1/L2 production on-call, implementing long-term fixes using idempotency, retries, circuit breakers, and fault-tolerant design.
- Mentored junior engineers, participated in hiring, and drove architecture reviews across pods.

Spinny

Software Development Engineer
November 2022 - November 2023 (1 year 1 month)
Gurugram, Haryana, India

- Built a post-sales documentation platform from scratch, streamlining vehicle ownership transfer for 60k+ cars/year and reducing turnaround time by ~3 days per vehicle.
- Designed an event-driven bot-builder platform (Web, WhatsApp, App), saving #40L+/year and reducing new bot rollout time by 12 hours.
- Developed an assignment engine for intelligent user-task matching based on vehicle and location data, improving workload distribution.
- Led large-scale data migration of 800k+ unstructured records with <1% error rate.
- Designed a persistent retry & recovery system for failed third-party API calls, significantly improving system reliability.

Zebra Technologies

Software Engineer I

October 2020 - October 2022 (2 years 1 month)

Pune, Maharashtra, India

- Built and scaled a retail operations management platform serving 10+ global tenants, 250k+ users, and 500k+ tasks/day using Java & Spring Boot.
- Implemented zero-downtime data migration pipelines from RDBMS to MongoDB with strong data correctness guarantees.
- Integrated CI/CD pipelines using Jenkins and SonarQube to automate builds, deployments, and code quality checks.

Ministry of Commerce and Industry, Government of India

Energy Management Research Intern

July 2019 - December 2019 (6 months)

Designed framework for waste heat recovery and utilization in Cement plants, which can save up to 10% of total energy input

UltraTech Cement

Summer Intern

May 2018 - July 2018 (3 months)

Neemuch

Studied role of process fans in cement plants and suggested methods to improve their efficiency

Department of Backstage & Infrastructure Management

1 year 3 months

Core Member

June 2017 - April 2018 (11 months)

Goa

Crew Member

February 2017 - June 2017 (5 months)

Goa

Alumni Relations Cell, BITS Pilani K.K. Birla Goa Campus

Member

August 2016 - August 2017 (1 year 1 month)

Worked with a team of 30 throughout the year to organize various events including Convocation for the graduating batch of 2018. Held a reunion for the first time in our college. Also organized various talks given by our Alumni for on-campus students.

Education

Birla Institute of Technology and Science, Pilani

Bachelor of Engineering (BE), Chemical Engineering · (2016 - 2020)
