Sahil S.

Software Engineer II at Microsoft | Ex Zomato, Adobe | DTU
Delhi, India

Summary

Currently working as Software Development Engineer II at Microsoft.

Interested in Software Development, Artificial intelligence, and Machine Learning.

Competitive Coder in free time. Five Star Coder at Codechef, Expert at Codeforces.

Experience

Microsoft
Software Engineer II
October 2024 - Present (1 year 9 months)
Noida

Zomato
4 years 5 months
Software Development Engineer II
June 2022 - October 2024 (2 years 5 months)
Gurugram, Haryana, India

Team: Everyday

- Working as a full stack engineer and made features like Roster Management, Inventory management, and revamped Consumer Menu
- Made a desktop application using Electron for automated kitchen operations like printing and client-side QR creation.
- Worked on Merchant Dashboard website for kitchen order management, optimizing operations, and enhancing efficiency.
- Designed and developed Kitchen Admin Dashboard UI for Dish, Meal, Chef, and Roster management.

Software Development Engineer I
June 2020 - May 2022 (2 years)

Gurgaon, Haryana, India

Team: Feeding India

Role:

- End to end Integrated One Time and Monthly Recurring Payments in USD and INR on Feeding India website.
- Automated acknowledgement emails, 80G emails being sent to the donors.
- Made Donation flow on Zomato app.
- Revamped the website design and architecture to improve performance and user experience.

Team: Web

Role:

- Incrementally revamped the Zomato website by decoupling frontend and backend. This involved working over multiple design and code iterations followed by pitching and refactoring. The revamped web, also branded Web 2.0, was taken Live initially on a city level. With subsequent feedback and page metrics comparable to (and in many cases, better than) the older version, it was pushed on a country level. Used ReactJS with SSR to amplify SEO and reduce bounce rate.
- Created multiple internal dashboards, eliminating the development effort and reducing the time from days to a few minutes, for creating web views for mobile app, conducting surveys, and user-choice awards.

GirlScript Summer of Code

Admin and Mentor

February 2020 - May 2020 (4 months)

India

Leading Team of 4 mentors and more than 100 participants for Crop.Ai project.

The intention of the project is to familiarize the student with open source development in the field of Machine Learning, Deep Learning and Android Development. It will be done by making a real-life application that can be used by the consumers.

Our aim is to make an end to end crop advisory app for farmers and gardeners. It can diagnose pest damage, plant disease and nutrient deficiencies that are affecting crops and can offer corresponding treatment measures.

Adobe

Product Development Intern

May 2019 - August 2019 (4 months)

Greater Noida

- Made Font Management Workflows for Adobe Bridge CC
- Used Common Extensibility Platform to make a Font Panel Extension.
- Used TypeKit API to make HTTP calls and used React JS to provide UI to the extension.
- Proposed Font Recommendation System for Adobe Bridge based on Collaborative Filtering, Content-Based Recommender, and Reinforcement Learning.
